METHODOLOGY

KEY LESSONS

- ABOUT TOOLS
- ABOUT METHODS
- ABOUT THE SOFTWARE DEVELOPMENT PROCESS

- Investigate deeply into API's you're using.
- If you're programming on android, make sure the team isn't all iPhone users.
- Learn the specifics of the software you're using.
- Hard to pull information from Facebook(go through facebook developer and generate hash key).
- The more often your development group meets, the quicker the development process goes.
